

INTERNATIONAL DLG

GOLD AWARD

ELITE QUALITY

MONOFLORAL **YEMEN SIDR HONEY**

Why Sidr Yemen Honey is so Special and Expensive ???

The Secret of **SIDR TREE**

The elite reputation of Yemen Sidr Honey is built on the distinctive features of the sacred Sidr trees (bot. *Ziziphus spina-christi*). The nectar produced inside the flowers of Sidr trees is extremely potent and full of nutritional values that contribute to the medicinal qualities of the honey. Untouched by chemicals, drugs or modern machinery the Sidr trees grow uncultivated in the desolated areas of Yemen, where the temperature contributes to the best quality of honey especially during production.

The Method of **BEEKEEPING**

Traditional beekeeping methods include only simple tools but a lot of diligence and well-preserved craft passed on to generations. What is the result? A product with no pesticides, toxins or antibiotics with a distinctive flavor, luring smell and numberless health properties due to vital enzymatic constituents preserved through the minimal processing.

Considered as **MEDICINAL**

Yemen Sidr Honey possesses potent anti-inflammatory, anti-septic, antipyretic and analgesic properties strengthens the immune systems and promotes general health and vitality. It's good for liver and digestive problems, stomach ulcers, respiratory infections, diseases resulting from malnutrition, eye diseases, infected wounds and burns. Doctors in Yemen even prescribe this Honey after childbirth and in cases of surgery to promote a speedy recovery.

How the ELITE quality of this Honey is proven ???

INTERNATIONAL DLG AWARD IN GOLD

Examined by
